1. We would like the Bot to tell the registering users for a bank account that their application has been accepted or denied with the following text:
- Congratulations, your application for account Austin Clifford Banking Account has been accepted.
- Unfortunately your application for account Austin Clifford Banking Account has been denied.

2. Please change the typo "ammount" into "amount" in all codes.

3. When a player successfully fills in an application, please show the following message:
Thank you for your banking account application. Your entry has been taken under revision by the staff team. You will be notified by Direct Message when your application has been processed.

4. Can you please add the correct commas and period when displaying numbers in bank accounts or account lists in the following format?**
A billion dollars equals: $1,000,000,000 (Leave out the cents)

5. Admin needs to be able to give an item to a player, and also needs to be able to change the value of the player's item through a command.
Preferably make another command like !itemadmin

6. Item creation doesn't work properly. I want it to be a form where people receive a question form, so they could more easily fill in the item name and details.
Please contact me for a bot (Unbelievaboat) which has this feature as an example.

7. Please change command !myitems into !inventory

SEE NEXT PAGE FOR MORE

8. I want to make it so that the item details are sorted behind the item itself. Right now the value is separated from the table but I would like all item info to be behind the item.

You currently have it like this:

Item Name	Item Type	Item Description
Mona Lisa	art	a beautiful painting
Item Value		Account:
$1000		Austin Clifford

And I want it like this:

Item Name	Item Type	Item Description	Item Value	Account:
Mona Lisa	art	a beautiful painting	$1000	Austin Clifford

9. Please have a 4th account type added called Trust and have it the same characteristics as a business banking account. So basically just copy the code of business and rename it to trust

10. Please add a cancel command in all forms you created. So if they type: "Cancel", the form will automatically end.

11. I want different !help commands for the following commands:
If they type !help please show this message:

In order to help you further, please specify what topic you need help on:
!helpbank
!helpitem
!helpadmin (if they have admin role)

!helpbank
This shows all the commands for regular players who are not admin relating bank account commands.

!helpitem
This shows all the commands for regular players who are not admin relating to item commands.

!helpitem
This shows all the commands for admin players who can do admin stuff if they have the role.
